September 2016 - June 2019, Davis, CA

---

## Experience

### Modern Campus / Web Developer

August 2021 - Present, Camarillo, CA

- Working to deliver custom modular high quality web applications to large higher education institutions
- Frontend development utilizing HTML, CSS, JavaScript, and XSL
- Backend development utilizing PHP and C#
- Managed and implemented the migration of current web app content of clients to newly implemented custom web apps using Ruby and Node tools
- Helped build testing framework to help automate more manual processes and improve developer experience

### Marley Finance/ Software Engineer Intern

July 2021 - August 2021, Chicago, IL

- Worked closely with development team on building out skeleton architecture for Marley's web and mobile application
- Full stack development utilized React, Node, and Javascript

### General Assembly / Teaching Assistant

July 2021 - August 2021, Remote

- Supported class instructors by managing student outreach, schedule organization, after class support, and technical troubleshooting
- Facilitated student learning through breakout room reviews and homework/project help going through the Python and Pandas framework curriculum

### LA Groundworks / Owner Operator

July 2019 - February 2021, Los Angeles, CA

- Designed, managed, and implemented residential scale fabrication projects
- Oversaw budgeting, design, installation, and client support for projects ranging from furniture fabrication to full space redesigns.

---

## Hobbies

Surfing - Ceramics - Car Restoration - Motorcycle Restoration - Fabrication - Hiking - Film
